

Elements SIG January 21, 2009

Because of time and space limitations, the next Elements SIG meeting will be Wednesday, February 18th at 10:00 in room #3 at the Activities Center.

Today, the Elements SIG met (1/21/2009) and used the Elements "workflow" as a vehicle for discussing various topics, including "Cropping," "Levels," and a non-destructive way to "Dodge and Burn" by using the "Overlay" mode.

After applying these techniques to a rather colorless, underexposed photograph, we soon had a vivid picture with rich blacks and whites and a wide gamut of colors.

Please bring questions (and answers) about Elements to the February meeting. If you would like to talk about how to apply Elements to one of your photographs, please put it on a flash drive and bring it to the next meeting.

Hope to see you in February (if not sooner).

Randall
