

Novice Photography SIG

Jim Bilbro, the President of the new Photography Club mentioned at the September Monthly Meeting that the new Club will enlarge the scope of its SIGs and will create a "Novice Photography SIG" as well as several others.

(We will not be doing those things that are currently being done in the Computer Club's Digital Camera SIG, or Photoshop 1 and 2. We want to concentrate on "photography" per se, and this will include learning how to get things done using.....but not actually teaching Photoshop Elements.)

Members who need to take Photoshop 1 and 2 and/or the Digital Camera Class should take this opportunity to sign up for these Computer Club Classes as soon as possible. These classes are now scheduled in October and November, so sign up quickly if you need to take them.

If you consider yourself something other than an "accomplished photographer," it may be to your (photography skills) benefit to join this SIG. Our goal is to help you become the photographer you want to be.

Please refer elsewhere on this webpage for a list of skills and experiences that Wes considers one should know in order to no longer consider oneself a Novice. He will structure the Boot Camp to cover all of these items.
