Posting Images to the Sun City Web Portal

Wes Odell has been asked to be the Editor for the CA's Web Portal. He will be responsible for selecting images for the Home Page (the front page of the Web Portal), and for selecting, posting and removing images for the Sun City Photos Gallery. Normally an image will appear for three months following the monthly update.

All pictures must have been taken here in Sun City Texas.

There are two different specifications for the two posting sites:

1. For the Home Page: 72 dpi resolution, created as a JPG image, Landscape format, 650 pixels wide and 200 pixels high. Submit on a CD/Rom. (Note: this is a change from the previous format of 900 by 200 because a news column intrudes into the space on the right side of the banner picture.)
2. For the Gallery: 72 dpi resolution, created as a JPG image, Landscape or Portrait format, 600 pixels by 450 pixels. Suggest a title for the image. Submit on a CD/Rom.

You may combine as many images of both types on one CD.

Do not send images by email, but deliver them on a CD to the Community Association (CA) Web Administrator in the Office of Communications (the building to the left of the CA Office.) Please put your name on the CD.

If you have questions, please contact the CA Web Administrator at 864 1217 or at webadministrator@sctx.org.
